

## Managing Change

For Team Leaders and Project Managers whose teams are either implementing change or going through it themselves.

*Do you need to ....*

*... manage your team through a period of change?*

*... inspire your team to see change as an opportunity?*

*... get practical advice on steering your team through the pitfalls?*

*... have a leadership model to which you can aspire ?*

This workshop looks at the theories of change and explores current thinking on change management. It focuses on practical tools, methods and techniques for managing change as well as the need for leadership, commitment and communication. A practical case study ensures that delegates confront the real issues.

### What will you learn?

- the changing world and how it impacts the way we run our organisation
- how to manage the transition that change brings
- the role of communication in achieving successful change
- how to create an environment for successful change
- the role of a change leader
- building teams in change environment

### What will you experience?

- practical techniques to manage successful change
- the impact of different styles of leadership
- coping with change as a team
- examples of communication strategies
- opportunities to discuss your own issues

**“It broke the wider problem of change management into manageable chunks. I will now be able to apply the techniques usefully to real situations”**

### What will you gain?

- an understanding of the issues that must be addressed to ensure successful change
- a framework for change
- a leadership model for effective change management
- practical tools and techniques for managing change in your environment
- guidelines for effective communication
